

ELKHAIR — HIGH PRIORITY LIST (Iran Demand)

Source: Afshin (Iran market partner) · **Logged:** June 22, 2026 **Purpose:** The cars in highest demand for Iran. Fill these to the brim from every source we have — **Dubizzle first, then DubiCars, then YallaMotors / Souq / etc.** Check this list back regularly until every model has solid multi-photo stock.

TOP 15 BEST SELLERS (fill these first)

#	Make	Model	In scrape rotation?

- **City, Civic, HR-V, CR-V**

MAZDA ← *entire make not scraped yet*

- **Mazda 3, CX-30, CX-5, CX-60**

CHANGAN ← *not scraped yet (best-seller #17)*

- (need specific model slugs)

SCRAPER COVERAGE GAPS — add these to the rotation

These high-demand models are **not currently in** `iran_refresh_all.sh`, so we're getting zero of them no matter how much we scrape:

Make	Model	Suggested Dubizzle slug (verify)
Toyota	Levin	<code>levin</code>
Toyota	Frontlander	<code>frontlander</code>
Nissan	Sylphy	<code>sylphy</code>
Nissan	Armada	<code>armada</code>
Mazda	Mazda 3	<code>mazda-3</code>
Mazda	CX-30	<code>cx-30</code>
Mazda	CX-5	<code>cx-5</code>
Mazda	CX-60	<code>cx-60</code>
Changan	(TBD)	<code>changan</code> (find model slugs)

HOW TO CHECK FILL STATUS (run anytime)

Paste in Supabase → SQL Editor to see current visible stock per model:

```
sql

select make, model, count(*) as visible_cars
from iran_inventory
where visible = true
group by make, model
order by make, visible_cars desc;
```

Compare the output against this list. Any priority model showing a low number (or missing entirely) is a gap to fill.

Trim-level filtering (LE vs Elite, etc.) is a future enhancement — right now we fill by make+model. Trims come once we're capturing trim data cleanly.
